UK Department of Computer Science

August 2019–August 2020

Undergraduate Research Assistant

Continued researching the topics studied at the 2019 Computer Vision REU, e.g., estimating flight routes. Also performed research on point cloud resampling via machine learning where the goal is to produce arbitrary resolutions for a given point cloud.

Computer Vision REU

May–August 2019

Undergraduate Researcher

REU in computer vision under the guidance of Dr. Nathan Jacobs at the University of Kentucky. Used machine learning to estimate the flight paths of planes capturing LiDAR data across all of Kentucky.
